

Worship Jam / Winter 2015

These songs only use these 5 chords. You can play most worship songs with these 5 chords. Learn these 5 chords! Practice switching between these chords while watching TV.

If a song needs to be in a weird key, buy a **capo** and continue to play these easy chords.

Use **ultimate-guitar.com** to look up chords to songs. You can even switch the key of the song using the controls on the left sidebar until it displays chords you are comfortable with. That's what I do!

A tuned guitar is the first step to being awesome. Always tune your guitar so you'll get used to what a tuned guitar sounds like. I like the iPhone app called **ClearTune**.
